EDUCATION

Georgia Institute of Technology

Aug 2026 – Expected 2028

Bachelor of Science in Computer Science

Atlanta, GA

Lawrence Technological University

Aug 2024 – May 2026

Dual Enrollment Coursework – GPA: 3.93/4.00

Southfield, MI

- Coursework: Computer Science II, Software Engineering I, Discrete Mathematics, Introduction to Data Science, Computer Networks, Computer Architecture and Assembly Programming, Operating Systems, Linear Algebra

EXPERIENCE

Founder and CTO

June 2026 – Present

GetPaid: Find & Claim Money

Remote

- Co-founded a fintech app helping consumers discover and claim class-action settlements and unclaimed property
- Architected the app's cross-platform attribution pipeline (RevenueCat, AppsFlyer, Meta) into a single source of truth across iOS and Android, creating reliable statistics to track brand growth and future analytical projections
- Built an automated subscription-cancellation engine on Plaid's Recurring Transactions API, combining exact- and fuzzy-matching logic to help consumers identify and cancel their unwanted charges across providers
- Surpassed \$100K in revenue, 20K monthly active users, and a #150 U.S. App Store Finance ranking in under 60d

Software Engineer Intern

Apr 2026 – May 2026

10x

Remote

- Contributed to Core OS, an AI-native desktop operating system built with Python, Qt/PySide6, and X11
- Architected a full notification framework: toast UI, notification center, SQLite persistence, actionable agent flows, hotkeys, and DND, with unified action dispatching across scheduler and agent systems
- Built foundational desktop interaction infrastructure: declarative focus-aware menu system, file/folder attachment pipeline, notification deep-linking, and extensible AI-agent interaction flows

Software Engineer Intern

Jan 2026 – Feb 2026

Nolla Health

Remote

- Engaged in a cross-company partnership to integrate Derm AI features into the Nolla Acne iOS app
- Designed and implemented in-app scanning streaks and a native home screen widget for streaks
- Architected and delivered an Accomplishments feature and environment-aware weather widgets, adding a detailed accomplishments sheet to track prescribed-treatment adherence, skin improvement, and streak maintenance

PROJECTS

DevBrain | *Next.js, Firebase, Firestore, TypeScript, OpenClaw*

June 2026

- Co-founded DevBrain (rebranded Synqed) at ClawComp, a Link Ventures-hosted hackathon, placing 2nd overall
- Architected a Firestore-backed shared state layer, exposed through a Next.js dashboard and an OpenClaw agent plugin, giving multiple AI coding agents a shared context window to prevent desync and duplicate work

Derm AI | *Expo, React Native, Node.js, Firebase*

June 2025 – June 2026

- Co-founder and CTO of Derm AI, an app for AI-powered skin analysis and product recommendations
- Integrated OpenAI and Cloud Vision APIs to analyze skin and suggest products based on user profiles
- Reached over 1,000 users, over 20,000 app store impressions, and over 2,000 scans taken

SpareLot | *HTML, CSS, React.js, Node.js, Firebase*

June 2024 – June 2025

- Founder and CTO of SpareLot, a fullstack platform for users to rent out underutilized storage spaces
- Implemented Firebase Auth, Firestore, and Cloud Functions to handle secure user data, listings, and transactions

TECHNICAL SKILLS

Languages: C++, C#, Swift, Java, Python, HTML, CSS, JavaScript, TypeScript

Frameworks: SwiftUI, TCA, React.js, React Native, Node.js, Firebase, OpenClaw

Developer Tools: Codex, Claude Code, Git, Google Cloud Platform, VS Code, Visual Studio

CERTIFICATIONS

Information Technology Specialist in Java, Python: Certiport / Pearson VUE
